

README Independent: These files should be removed if present on the system regardless of what the README says

- bind9
- telnet*
- iodine
- kismet
- nikto
- john
- medusa
- hydra
- fcrackzip
- ayttm
- empathy
- logkeys
- vino
- tightvncserver
- rdesktop
- remmina
- vinagre
- netcat*

README Dependent- These files are not necessarily harmful; however, unless the README states to keep that specific package for the image (ie this is an FTP server, so keep vsftpd)
If the package is NOT put in the README do NOT keep it

- Apache2
- nginx
- vsftpd
- openssh*
- samba
- mysql*
- postfix
- mongodb
- mariadb
- sqlite
